

### **Amendments to the Claims**

This listing of claims will replace all prior versions, and listings, of claims in the application.

### **Listing of Claims:**

Claim 1: (Cancelled)

Claim 2: (Cancelled)

Claim 3 (Previously presented) An eraser as set forth in claim 37, wherein the skeleton structure is continuous.

Claim 4 (Cancelled)

Claim 5 (Cancelled)

Claim 6 (Previously presented) An eraser set forth in claim 37, wherein the elastic material for erasing has a filling rate in a range from not less than 50 % to less than 100 % with respect to an entire volume of the void portions of the porous structural material.

Claim 7 (Currently Amended) An eraser as set forth in claim 37 2, wherein the porous structural material and the elastic material for erasing are integrated into a composite part.

Claim 8 (Previously presented) An eraser as set forth in claim 37, wherein the skeleton portion of the skeleton structure has an average thickness of 1 to 100  $\mu\text{m}$ .

Claim 9 (Previously presented) An eraser as set forth in claim 37, wherein the void portion of the skeleton structure has an average pore size of 10  $\mu\text{m}$  to 3 mm.

Claim 10 (Currently amended) An eraser as set forth in claim 37 2, wherein the porous structural material contains a cross sectional shape with virtually polygonal or virtually circular cells.

Claim 11 (Currently amended) An eraser as set forth in claim 37 2, wherein the porous structural material is foamed structural material.

Claim 12 (Currently amended) An eraser as set forth in claim 37 2, wherein the porous structural material is a mesh structural material.

Claim 13 (Original) An eraser as set forth in claim 11, wherein the porous structural material is a stereoscopic mesh structural material.

Claim 14 (Currently amended) An eraser as set forth in claim 37 2, wherein the porous structural material has a tensile strength of not more than  $3 \text{ kgf/cm}^2$ .

Claim 15 (Currently amended) An eraser as set forth in claim 37 2, wherein the porous structural material has an extension percentage of not more than 500 %.

Claim 16 (Currently amended) An eraser as set forth in claim 37 2, wherein the porous structural material has a compression repulsive force of not less than 0.2 kgf.

Claim 17 (Currently amended) An eraser as set forth in claim 37 2, wherein the porous structural material has a tensile strength of not more than  $3 \text{ kgf/cm}^2$ , an extension percentage of not more than 500 %, and a compression repulsive force of not less than 0.2 kgf.

Claim 18 (Currently amended) An eraser as set forth in claim 37, wherein the eraser has a surface hardness of 50 to 80 as measured according to JIS S6050.

Claim 19 (Previously presented) An eraser as set forth in claim 37, wherein the eraser has a sticking strength of 1.5 to 20 kgf.

Claim 20 (Previously presented) An eraser as set forth in claim 37, wherein the eraser has a coefficient of friction of not more than 0.8.

Claim 21 (Previously presented) An eraser as set forth in claim 37, wherein the eraser has a wear rate of not less than 1 %.

Claim 22 (Currently amended) An eraser having a surface hardness of 50 to 80 as measured according to JIS S6050, a sticking strength of 1.5 to 20 kgf, a coefficient of friction of not more than 0.8 and a wear rate of not less than 1 %.

Claim 23 (Currently amended) An eraser as set forth in claim 37 2, wherein at least one of the porous structural material and the elastic material for erasing is colored.

Claim 24 (Currently amended) An eraser as set forth in claim 37 2, wherein the skeleton structure is constituted by a plurality of blocks of porous structural materials.

Claim 25 (Original) An eraser as set forth in claim 24, wherein the blocks have at least one shape selected from the group consisting of spherical, polygonal, and plate shapes.

Claim 26 (Currently amended) An eraser as set forth in claim 37, wherein the eraser comprises ~~which is an exchanging-use eraser of a type that is in combination with at least one member~~ selected from the group consisting of a feeding-type eraser, a knocking-type eraser, an eraser attached to an end of a mechanical pencil, ~~and~~ or an electric-type eraser.

Claim 27 (Withdrawn) A feeding type eraser to which the eraser set forth in claim 37 is attached.

Claim 28 (Withdrawn) A knocking-type eraser to which the eraser set forth in claim 37 is attached.

Claim 29 (Withdrawn) A mechanical pencil having an end plug portion to which the eraser set forth in claim 37 is attached.

Claim 30 (Previously presented) An electric-eraser having an eraser holder to which the eraser set forth in claim 37 is attached.

Claims 31 - 36 (Cancelled)

Claim 37 (Currently amended) An eraser comprising:

an elastic material for erasing, and  
a skeleton structure; wherein  
the elastic material for erasing comprises an eraser composition selected from the group  
consisting of a rubber component, a resin component, or a mixture thereof; and  
the-a skeleton structure that comprises a porous structural material comprising an organic  
polymer, wherein said skeleton structure comprises a skeleton portion and a void portion,  
wherein:

the void portion is filled with ~~an~~ the elastic material ~~for erasing selected from the~~  
~~group consisting of a rubber component, a resin component, and mixtures thereof, and~~

the skeleton portion at an erasing surface of the elastic material is broken from the  
eraser by a deformation force and becomes part of an eraser scrap as the eraser is used,  
the eraser scrap includes the broken skeleton portion and the elastic material that has  
worn off the eraser as the eraser is used.
